

```
std::integral_constant< bool, std::is_same< traits::unit_t_traits< T1 >::non_linear_scale_type, traits::unit_t_traits< T2 >::non_linear_scale_type >::value >
```

units::traits::is\_same\_scale< T1, T2 >

A vertical arrow points from the text 'units::traits::is\_same\_scale< T1, T2 >' in the bottom box to the 'std::is\_same' part of the code in the top box.
