

```
std::integral_constant< bool, all_true< detail::is_pressure_unit_impl< std::decay< T >::type >::value...>::value >
```

```
units::traits::is_pressure_unit< T >
```

A vertical arrow points from the expression 'units::traits::is_pressure_unit< T >' in the bottom box to the 'all_true<' argument in the 'std::integral_constant' expression in the top box.
